New Year, Same Waterstons

We've got some exciting new things in the works for 2023. What will remain the same is our same dedicated teams, ethics, and values and same expert problem-solving.

2023 is going to be a massive year for the team. Last year, we hit the ground running & this year is no different.

We're more passionate than ever to deliver great work to our valued clients. We're more dedicated than ever to creating a company culture where our people are just as passionate as we are. Best of all, we're thrilled to be partnering with some very special organisations to share our knowledge and expand our networks.

We've got a busy year ahead & we can't share everything that we're doing just yet. So, keep up to date by joining our mailing list.

Here are some of the events we'll be part of in 2023.

Women In Tech, March 2023 - We're proudly sponsoring this event. Charlie will be also hosting a roundtable discussion on Cyber Security & presenting on Workplace Culture. You can read more and purchase tickets here.

THETA I Higher Education Conference, April 2023 - We're also proudly sponsoring and speaking at this event. We're looking forward to traveling to Brisbane for the conference and networking with all members of the Higher Education Sector. You can read more and purchase tickets here.

What else will we be up to?

- We have some new products & services launching in 2023 (keep an eye out for this)
- We'll still be commenting in the news on everything tech & Cyber Security
- We'll continue to expand our team as our organisation grows
- So much more that we can't yet share! Join our mailing list.

A final thought from our MD, Charlie Hales. *"Our team are everything. We deliver such great work because everyone is thrilled to be at work, they're thrilled to problem solve, to collaborate, to overcome. Their work ethic and enthusiasm permeates throughout the office, their clients and the team in the UK. I'm excited for 2023 and our future in Australia, there's plenty of work to be done and these last 3 years are just the beginning."*
